TIRED OF EXPENSIVE ELECTRICITY BILLS?

Generate your own electricity for the next 30 years.
Find out how with Singapore's number 1 residential solar installer.

—— How to start earning by selling Solar Power? ——

1. Proposal

- Enquiry with us today and our team will prepare a **customized proposal** based on your roof type and size for your consideration. We do not charge for any initial assessment.

2. Installation

- We only use **Tier 1 components** to ensure the reliable performance of our systems. Our systems have been operational **since 2013 with no major issues!**
- Our in-house installation team is experienced and has worked on various roof surfaces and angles.
- We **do not use any subcontractors** to ensure our workmanship is up to our high standards.

3. Commission

- All our systems are **endorsed by a Licensed Electrical Worker (LEW)** and officially **commissioned by Singapore Power** for connection to the grid.

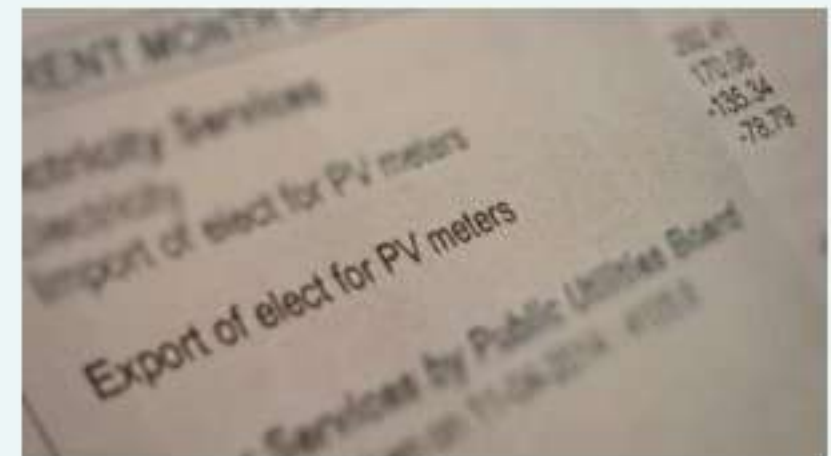

4. Maintenance

- Yearly maintenance is recommended, the first **2 service sessions are complimentary**.
- Daily performance of the system can be **monitored via a smartphone app**.

5. Sell

- Any excess solar electricity generated by the system will be automatically **sold back to the power grid**.
- The exported amount will be **credited to your monthly bill** and can offset other utility charges like water, gas and waste collection.

What's Rezeca Renewables?

Rezeca Renewables is a pioneering Singapore based company in the field of renewable power and energy efficiency. Leveraging on our experience since 2009 in renewable power, we develop and deliver viable and proven renewable energy solutions for the long-term benefit of our clients and the environment.

We have established ourselves as a leading provider of grid-tied solar power systems in Singapore and Thailand. We are passionate and committed about renewable energy, and eager to do our part for the environment. We hope to have the opportunity to work closely with you, for a sustainable green environment for our families and future generations.

Why Rezeca Renewables?

Our aim is to help our customers and partners switch to renewable forms of power generation and implement energy efficiency measures, as easily and seamlessly as possible, with proven cost-effective solutions that bring long-term economic and environmental benefits.

We highly value the environment that our forefathers have given to us, the trust that our customers have placed in us, and the contributions of our employees and business partners.

Who's Rezeca Renewables?

Our team comprises of dedicated professionals with backgrounds in electrical engineering, mechanical engineering and banking/finance. In our past careers, we were R&D scientists, university lecturers, power plant developers, CFOs, and project finance/corporate bankers. Now, we are simply passionate believers in the future of renewable energy, committed to transforming our vision and values into reality.

We are committed to give back to the society.

There are still communities in rural Asia live without electricity. We installed off-grid solar power systems in village schools in Laos and provided them with LED lights.

Ecoventure 2019 (Laos)

- Installed a 1.6kwp Off Grid solar power system for the school in Ban Hua Hin Village, Oudomxay Province, Luang Prabang, Laos

CSR VIDEO 2019

Ban Keng Khene and Ban Lad Khammune, Laos.

- Sponsored LED lights and holders for the village school of Ban Keng Khene, four hours upstream from Luang Prabang
- Installed a 3kW solar power system that is sufficient to power LED lights and fans of the secondary school in Ban Lad Khammune, another hour upstream from Ban Keng Khene

CSR VIDEO

Ban Phongsavanh, Laos

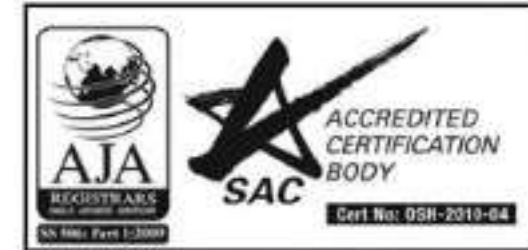

- Installed a 2kW solar power system for the school in Ban Phongsavanh, four hours by boat upstream from Luang Prabang
